

Progress on New School

August 2018

Current classrooms of Garden School in Fizi Territory, DRC

The dream of building a brick school building for “Complexe Scolaire Bustani” or Garden School in Fizi, Democratic Republic of Congo (DRC) was shared in the April 2018 newsletter. The school was started in 2015 and during that year parents of the students managed to

Parents constructed 31,000 bricks

make 31,000 bricks that were waiting to be used in the construction of the new school. We are delighted to share the good news that not only has the foundation been completed, but the walls are going up! Seeing the progress that is being made inspires us to see this vital project to completion. Pastor Fred believes that if funds are available the school could be completed by the end of September.

The remaining cost to complete the entire building is about \$12,000. Perhaps you would like to provide one of the six doors needed at a cost of \$170

Foundation of new school building — May, 2018

or a window at a cost of \$90. Eighteen windows are needed. In addition to all the bricks produced by the parents they will need to purchase an additional 4,000 at a cost of \$550. Any amount you would like to contribute would be a wonderful investment in the lives of not only the current students, but students for many years to come. Thank you for helping!

It is exciting to see the walls going up! — July, 2018

Update on Ngena: Pastor Jeremiah informed us that Ngena continues to make good progress in his healing and recovery from surgical removal of a tumor on his arm. The doctor has released him to return to his studies in Kampala. He will need a follow-up visit in Nairobi in six weeks. Thanks to all who contributed to his medical expenses. Please continue to pray for complete healing for Ngena.

A Need Supplied in India

Drilling and installation of a well in India

Reverend Thomas and Pastor Lazarus send their sincere thanks to all who contributed to make the installation of the new bore well a reality for the Kuchupudi Church. In addition to the well, some funds were also sent to help with the ongoing construction expenses. The members of this village

church have been working to complete it for two years. Our prayers and financial support are a real encouragement to them. Additional funds are still needed to finish the church building.

New Church in Thailand

Global Outreach has partnered with Reverend Wanchai Supawas in Sameong, Thailand for over thirty years. During those years Wanchai and his wife, Pensri, have invested their lives in ministry to reach and rescue boys, girls, and teens from troubled lifestyles in the various hilltribes of Thailand. These students lived in the home for varying amounts of time receiving an education, love, care, and Bible training. Hundreds of children's lives have been impacted for Christ through this ministry. Major funding from Global Outreach was used to build the home, original church and the dormitories used for ministry to these girls and boys.

Throughout these past thirty years, Wanchai has also been the Pastor for his local community church. He has also planted many churches in the area. Wanchai recently informed us that his church building is crumbling from damage by insects. He is asking our help to build a new church just as we helped build the original one thirty-three years ago. The total cost of the new church will be \$25,000 and we have already sent a small donation. He has raised most of the funds himself, but anything we can give will be a big help to him. If you would like to contribute to this need, please designate your donation for Thailand.
